- Reviewed and analyzed data to enhance AI performance.

Content Writer – FactsGhost.com

📍 Kathmandu | 📅 June 2022 – July 2023

- Wrote engaging and SEO-optimized articles on diverse topics.
- Improved content engagement through keyword strategy and audience targeting.

PROJECTS

All projects can be found on my GitHub repository 📁 github.com/rahulshah1122

1. OPD Management System GitHub: [OPD Management System](#)

🔧 Stack: C++

Developed a system for managing outpatient records with storage and retrieval features.

2. Hostel Booking System GitHub: [Hostel Booking System](#)

🔧 Stack: PHP, Vanilla JS, MySQL

Built a web platform with real-time availability and user authentication.

3. Vegetable Detection & Recipe Recommendation System GitHub: [Link](#)

🔧 Stack: Streamlit, Python, Machine Learning

Created a web app that detects vegetables and suggests recipes using image processing and ML.

EDUCATION

Kantipur City College

📍 Putalisadak, Kathmandu

🎓 Bachelor of Computer Engineering (December 2020 – Present)

PROJECTS

1. HR Employee Performance Review Portal

Tech Stack: React, Axios, CSS, WebSocket (frontend); Django, Django REST Framework, Django Channels (backend)

- Built a full-stack portal with role-based access (Admin/Manager/Employee) for managing teams, goals, and performance reviews.
- Architected both frontend and backend modules, implemented RESTful APIs, and integrated real-time chat for communication.
- Established testing pipelines for both React and Django, configured containerized deployment support.

2. OPD Management System

Tech Stack: C++

- Developed a system for managing outpatient records with storage and retrieval features.

3. Hostel Booking System

Tech Stack: PHP, Vanilla JS, MySQL

- Built a web platform with real-time availability and user authentication.

4. Vegetable Detection & Recipe Recommendation System

Tech Stack: Streamlit, Python, Machine Learning

- Created a web app that detects vegetables and suggests recipes using image processing and ML.

UPDATED SKILLS SUMMARY
